Sign up deadline: August 30th, 2021

BE A PART OF THE ENDOSCOPY REVOLUTION

What is INNOLUTIONS??

The Innolutions project launched by Open Innovation in Life Sciences association was designed to bring the **expertise of early career researchers** to help startups trouble shoot in real time, while providing the space for the participants to **show off their problem solving skills**, **broaden their network** and **interact with the start up community**.

Launch Day

Teams get assigned according to their expertise and their skill set

September

Touch base Event

Teams have individual sit downs with the aiEndoscopic Team to discuss the feasibility of their ideas and discuss possible improvements

October

Pitch Day

Teams pitch their ideas and a winner is chosen
Networking Apero to follow

November

Who is aiEndoscopic??

aiEndoscopic, a **spin-off** of an interdisciplinary project held between **ETH, UZH, and USZ**, focuses on **innovation in endoscopic medical devices**.

Their current project is in airway management:

IntuBot – an assistive device for easier and safer tracheal intubation.

"We combine Biomedical Engineering, Robotics, and Computer Vision to create an all-in-one device to provide safe intubations, regardless of the user's experience level."

Work in teams on...

CV optimisation with two cameras

Path optimisation using 5DoF

Designing training software for laryngoscope placement

Join our Q&A with aiEndoscopic
